Abstract (en)
[origin: WO9108358A1] The present invention relates to an apparatus for realizing a switchable, for example retractable and protractable, screen partition which is releasably secured to a wall at one side edge, and which includes a number of panel-shaped elements (1) pivotal in at least one direction and interconnected with one another, and a support (29, 60-63) on at least one of the elements (1), the support resting on a substrate, for example a floor, and releasable anchorage means being provided between the wall and the element most proximal the wall.
