Abstract (en)

[origin: WO9205318A1] A construction has a fore-part (1) made of stiff supporting elements (3), a supporting framework (2) filled from the back with bulk or compacted materials and flexible, flat bracing elements (6) that link the fore-part (1) to the supporting framework (2). Each bracing element (6) surrounds an anchoring element (7) that extends transversely to the bracing direction and that co-operates with an abutment (8) that projects freely downwards or upwards, arranged in the area of the supporting element back side.
