Abstract (en)
[origin: EP0502793A1] - Training equipment. <??>- The mine is characterised in that: . the body (1) is formed by a one-piece overmoulding (8) around the ballast (6), . the tabs (9) are formed by the bent end parts of fittings (10) embedded in the part of the body surrounding the ballast, . and the ballast is formed or composed so that its centre of gravity is arranged on the axial and transverse axes of symmetry of the body. <??>- The invention is used for landmines. <IMAGE>
