Abstract (en)

[origin: EP0502798A1] Installation making it possible to inspect a material stored in the form of a wound package (3). It comprises an unwinding or feed station (2), a display station (4) and a rewinding or reception station (5). The feed station (2) and reception station consist of two endless movable conveyors (7, 8) which support the material rolls over the entire width, are inclined and are associated with two cylinders (9, 10), making it possible to ensure that the material rolls are held. <IMAGE>
