Abstract (en)
[origin: WO9108483A1] The present invention relates to intercellular adhesion inhibitory factors produced by cytokine activated endothelial cells. These factors designated endothelial-derived IL-8 find use in the diagnosis and treatment of inflammation and in the protection of endothelial cells from neutrophil mediated damage.

Abstract (fr)
Cette invention concerne des facteurs d'inhibition d'adhérence intercellulaire produits par des cellules endothéliales activées par la cytokine. Ces facteurs, connus sous le nom d'IL-8 endothéliale sont utiles au diagnostic et au traitement d'inflammations et à la protection des cellules endothéliales contre les dommages dus aux neutrophiles.
