Abstract (en)
[origin: WO9108394A1] The invention concerns a wind turbine for harnessing wind energy, characterized by: (a) a mast (4); (b) n upright rotor blades (8) located at intervals round the circumference of a circle and mounted a certain radial distance from a shaft (59) and (c) a support structure (6) for the rotor blades (8), extending from the mast (4) to the rotor blades (8).

Abstract (fr)
Une éolienne (2) pour capter l'énergie du vent comprend: un mât (4); (b) n pales droites (8) de rotor mutuellement espacées dans le sens de la circonférence et radialement espacées par rapport à un axe de rotation (59); et (c) une structure (6) de support des pales (8) du rotor qui mène du mât (4) aux pales (8) du rotor.
