Abstract (en)
[origin: EP0503133A2] The invention relates to a clock having a water-tight housing 1 in whose interior 9 there are arranged a clockwork 4 and a tone generating device. A viewing opening of the housing 1 is sealed by a cover glass 11. One region of the housing wall is constructed to be capable of vibration, the region which is capable of vibration bounding on the outside the part of the interior 9 in which the tone generating device is arranged. <IMAGE>
