Abstract (en)

[origin: EP0503373A2] The invention relates to a container, especially a suitcase, with at least one pair (4, 5) of castors attached to the bottom wall (2) thereof, the volume of the container being variable. An adjustment device (9) is provided which, for the purposes of adjustment to a change of volume of the container, permits a change in the distance (D1) of the castors (4, 5) from one another in the direction in which the change of volume occurs. <IMAGE>
