Abstract (en)

A phosphate-free automatic dishwashing composition comprising nonionic tenside, carboxylic acid, water-soluble alkaline compound and bleach, as well as optionally one or more adjuvants or additives, where the bleach is a chlorine-free, oxygen donating bleach, and where the automatic dishwashing composition comprises carbonate, polycarboxylate, polyfunctional carboxylic acid, silicate, and nonionic tenside. The composition may advantageously be in the form of a tablet. The automatic dishwashing composition has an excellent tea stain removing ability, despite its relatively low alkalinity.
