Abstract (en)

[origin: EP0504568A1] In order to simplify the refillability of the reservoir in a high-pressure cleaning device with a high-pressure pump arranged in a housing (2), a fluid feed, a pressure line for the fluid fed by the high-pressure pump and with a chemical intake which sucks via an intake line (13) a chemical from a reservoir which is arranged in the housing (2), it is proposed that a compartment (3) which can be closed by means of a cover (4) be arranged in the housing (2), in which compartment a removable chemical container (6) is located, that the chemical container (6) should have an opening (7) which can be closed with a removable lid (9), that the intake line (13) should penetrate the lid and dip into the inside of the container and that the container (6) should be releasably held on the cover (4). <IMAGE>
