Abstract (en)
[origin: EP0504827A2] A pipe disconnecter is proposed, having a housing, an inlet and outlet connection and a slide, the slide possessing a channel for the flow of the medium and a ventilation opening and being arranged to be displaceable transversely to the flow direction of the medium. The slide is of substantially cylindrical construction, and the housing of the pipe disconnecter possesses a bore perpendicular to the flow of the medium for receiving the slide. <IMAGE>
