Abstract (en)

[origin: EP0505300A1] The packaging comprises a casing (1) having a general parallelepipedal form, at least one face (11) of which slopes towards the outside, and a lid (2) comprising a fold (21) at the level of the junction of its upper part (22) and of its frontal part (23), the said lid (2) being fastened to the casing (1) at the level of its edge (24, 25) which covers and envelopes the edge (14, 15) of the said casing (1). Fastening the lid (2) to the casing (1) can be achieved by heat sealing or adhesive bonding of the edge (24) of the upper part (22) of the lid (2) on the edge (14) of the casing (1), the frontal part (23) of the said lid (2) comprising at its front edge (25) a tamper-proof tongue (3) which is heat sealed or adhesively bonded on a tongue integral with the casing. It may also be achieved by means of catches (4) integral with the edges (24, 25) of the lid (2) and introduced in orifices provided in the edges (14, 15) of the casing (1). <IMAGE>
