Abstract (en)
[origin: EP0505335A2] A continuous protective sheath for wiring electrical cable bundles comprises an end sheath portion coupled to a handle element housing an electrical contact bearing block, which is embedded, together with the corresponding portion of the handle, in a sealing structural element which is made of a foamed plastic material and includes therein a handle inlet union so as to firmly restrain the latter to the cable sheath which, in particular, can be either of the smooth or of the corrugated type. <IMAGE>
