Abstract (en)

[origin: DE3940803A1] Selected, benzoic acid diesters of straight-chain and/or branched aliphatic diols with at least 4 carbon atoms, which are free-flowing at ambient temperature, are used as non-volatile, non-polluting solvents for active ingredients such as oxidation and/or corrosion inhibitors with at least a partially aromatic molecular structure when the latter are used in environmentally safe fats and/or oils, in particular hydraulic oils based on diester oils.

Abstract (fr)

On utilise des diesters d'acide benzoïque, fluides à la température ambiante, de diols à chaîne droite et/ou ramifiée ayant au moins 4 atomes de carbone comme solvants peu volatils, non polluants, de substances actives, telles que des inhibiteurs de la corrosion et/ou de l'oxydation, ayant au moins en partie une structure moléculaire aromatique, lorsque ces substances actives sont ajoutées à des graisses et/ou à des huiles à biocompatibilité élevée, notamment des huiles hydrauliques à base d'huiles-esters.
