Abstract (en)

[origin: WO9206839A1] In order to design a device for removing a residual web (9) from a supporting web (7) that is as simple and economical as possible, with a deflecting device (5, 6) of the webs that separates the residual web from the supporting web, the residual web is partially wound around a further cylinder (11) and adheres thereto. A doctor blade (12) is then applied to said cylinder.
