Abstract (en)

[origin: EP0505675A1] A reclosable package for a stack of paper towels is described which is produced from a single blank. The package has the following features: - the preferably upright cuboid package has -- in each case a front and a rear main surface 1; 2, -- in each case a right and a left side surface 3; 4, -- a bottom surface 5, and -- a top covering surface 6; - in the front main surface 1 there is an incision 7 starting from the upper edge and - the rear main surface is extended integrally to form a closure flap 9, -- which can be folded over the contents 10 of the package and, in the folded-down position, extends beyond the incision in the front main surface, - the two side surfaces 3, 4 likewise extend beyond the contents of the package and are connected to the closure flap 9 forming lateral closure tabs 11, 12, - in the opened-out state, the free edge 14 of each side closure tab 11, 12 forms a smooth curve -- e.g. a straight -- or a curved line. The package can consist of film or paper.
