Abstract (en)  
The locking mechanism comprises a compact assembly formed by a contact holder (1) produced by assembling two flanges (2, 3) which can be joined together and which carry between them, around their common pivot pin (30), a trip lever (19) integral with a pawl (25), rotating about the common pin (30), the moving contact (16) being mounted pivotably about another pin (17) between the said two flanges so as to be stressed in the contact position by a spring (31) bearing on the casing. <IMAGE>

Abstract (fr)  
Le mécanisme de serrure comprend un ensemble compact formé d'un porte-contact (1) réalisé par l'assemblage de deux flasques (2, 3) susceptibles d'être réunis l'un à l'autre et portant entre eux, autour de leur axe de pivotement commun (30), un levier déclencheur (19) solidaire d'un cliquet (25), tournant autour de l'axe commun (30), le contact mobile (16) étant monté pivotant autour d'un autre axe (17), entre lesdits deux flasques pour être sollicité en position de contact par un ressort (31) s'appuyant sur le boîtier. <IMAGE>
