Abstract (en)

In this case, the front face of the body (3) is open while its rear face is open over at least part of its height, the case (2) serving to mount a drawer (6) so as to be slidable and intended to be removed at least partially from the case through the front face of the latter, the drawer being equipped with means for retaining in the vertical position, along at least one row oriented in the direction of the length of the drawer, a plurality of objects (13) each fastened on a plate (12), these retaining means being such that the last object of each row located on the side of the rear face of the case is placed back-to-back with the preceding object. Application to displaying objects for sale, each of which is packaged on a plate. <IMAGE>
