Abstract (en)

[origin: US5321869A] PCT No. PCT/EP91/02126 Sec. 371 Date Jul. 29, 1992 Sec. 102(e) Date Jul. 29, 1992 PCT Filed Nov. 9, 1991 PCT Pub. No. WO92/10313 PCT Pub. Date Jun. 25, 1992. For removal of a painted surface (12), a rotating head (18) provided on a housing (10) is used, said rotating head (18) being provided with nozzles (19,20) which said nozzles (19,20) discharge high-energy jets (39) under high pressure towards the surface (12). The rotating head (18) is set into rotation by the recoil of the discharged high-energy jets. On the rotating head (18) an impeller (30) is secured constituting a centrifugal pump for the discharging of liquids in the housing (10).

Abstract (fr)

Pour le décapage d'une surface vernie (12) est utilisée une tête de rotor (18) disposée dans un carter (10), laquelle présente des buses (19, 20) à partir desquelles des jets à haute énergie (39) sont dirigés contre la surface (12). La tête de rotor (18) est mise en rotation par le contrecoup provoqué par les jets sortants. Sur la tête de rotor (18) est fixée une roue-hélice (30) constituant une pompe centrifuge pour l'évacuation du liquide hors du carter (10).
