Abstract (en)

[origin: EP0507079A1] The invention relates to an arrangement of additional corner brushes (4a,4b) on electrically driven floor brushing and polishing devices (1). Each corner brush is arranged separately on a swivellable lever (6) and can be brought into contact with the main brushing or main polishing discs (2a,b,c) via a movable housing part (11). The movement of the additional corner brushes is thus switched on and off by actuating this housing part. <IMAGE>
