Abstract (en)  
The present invention relates to a video cassette recorder, supplied with means for receiving a television program, means for recording the latter, a clock, a data memory, means for storing in said memory the time in which a program that is desired to be recorded begins and control means for reading said clock and said memory and for activating said receiving means and said means for recording the television program at the indicated time or at a pre-determined interval of time before; the characterising principle of the invention consists in the fact that the programming of the recording operation can be maintained without interfering with the normal use of the recorder, and that the user is informed as to whether such use may have placed the recording of the program at risk. <IMAGE>
