Abstract (en)
[origin: CA2064485A1] The present invention relates to a textile layering machine with a layering table and a layering carriage that can be moved above the table. The layering table incorporates a cutout in which there is a ripping apparatus that is used to separate sections of the textile webs that are laid out on the layering table, and to do this along the threads of the textile, the ripping apparatus incorporates a slide that can be telescoped out beyond the cutout.
