Abstract (en)  
An insulated container for biologically degradable organic material, e.g. an insulated meal container, comprises a tray (2) and a removable lid (4) which may be fitted thereon. The tray (2) comprises a one-piece moulding (6) of foamed plastics material and defines a plurality of recesses (26) which accommodate respective receptacles, e.g. food receptacles (28). The lid (4) comprises a one-piece moulding (14) of resilient foamed plastics material and defines at least one recess (38) which accommodates a heat sink, e.g. constituted by a beverage container (40), which is push-fitted and retained in position in the recess by the resilience of the resilient plastics material. <IMAGE>
