Abstract (en)  
A fabric softening composition comprising a water insoluble cationic fabric softening agent and a nonionic stabilising agent wherein the water insoluble cationic fabric softening agent is a biodegradable quaternary ammonium material with at least one ester link and the nonionic stabilising agent is selected from: i. a linear C<sub>8</sub> to C<sub>22</sub> alcohol alkoxylated with 10 to 20 moles of alkylene oxide, or ii. a C<sub>10</sub> to C<sub>20</sub> alcohol or mixtures thereof. The invention also provides a process for making the liquid fabric softening composition comprising the steps of: i. mixing and heating the cationic fabric softening agent and nonionic stabilising agent to form a melt and ii. dispersing the melt in water.
