Abstract (en)

The streamlined case 1 has the form of a shell moulded from a composite material which covers the dispensing head 3 to which it is fastened, with projections on either side, one of the projecting parts having the shape of a handle 12 to hold the fire extinguisher, and the other projecting part receiving a control ring 24 capable of being pulled by sliding out of the streamlined casing, mechanical linking means (32, 34) being localised inside the streamlined casing to transmit the movement of the ring to a hammer 35 for opening the gas cartridge. Application to fire extinguishers.
