Abstract (en)

[origin: EP0507714A2] The present invention relates to a device for laying self-adhesive strips, especially for ground marking. Device characterised in that it is self-contained and in that it consists essentially of a movable chassis (1) for supporting a means (2) for unwinding the strip (3), of a roller (4) for applying the strip (3) onto the ground, of a device (5) for transferring the strip (3) from the unwinding means (2) to the applying roller (4), of a means (6) for unsticking and collecting the film (7) protecting the self-adhesive face, of a device (8) for cutting the strip (3) and of an assembly (9) for driving the chassis (1) and the various devices and means for unwinding (2), for unsticking and for collecting (6) and for cutting (8). <IMAGE>
