Abstract (en)

[origin: DE3943087C1] The eaves cladding has supports (1) and cladding sections (11) in which the flanks (3, 4) of the one-piece angled supports (1) have surfaces (5, 6) which extend over and press on the end edges (9, 10) of the cladding sections (11) on the outside and are secured to the eaves. The eaves cladding is extremely easy to fit since, after the supports (1) have been fitted and adjusted, the cladding sections (11) can be easily inserted behind the side surfaces of the support flanks, making securing measures for the sections (11) at the eaves superfluous.
