Abstract (en)

[origin: WO9109949A1] A target-specific, cytotoxic, recombinant Pseudomonas exotoxin is described. Such toxins are made by inserting specific recognition molecules at specific cloning sites in at least domain III at the carboxyl terminus of the PE molecule. Various modifications of the carboxyl terminus of the PE molecule to increase cytotoxicity are set forth.

Abstract (fr)

Exotoxine de Pseudomonas, cytotoxique, recombinée spécifique à une cible. Lesdites toxines sont obtenues par insertion de molécules de reconnaissance spécifiques sur des sites de clonage spécifiques, dans au moins le domaine III au niveau de la terminaison carboxyle de la molécule PE. Diverses modifications de la terminaison carboxyle de la molécule PE augmentant la cytotoxicité, sont présentées.
