Abstract (en)

[origin: EP0509185A1] A feeding device or reciprocating pumps comprising a vertical conduit (11) communicating at the upper end with the liquid tank and at the lower end with the pumping chamber (2), a gravity bowl valve (12) disposed near the lower end and formed of a cap having the form of a spherical bowl cooperating with a sealing seat formed in the conduit (11) and resting under opened condition on a pierced washer (9) so as to allow any gas fraction or steam bubbles to be returned from the pumping chamber (2) to the feeding tank during the suction stroke. <IMAGE>
