Abstract (en)

[origin: EP0509411A1] The invention relates to a lockable slider for slide fasteners, in whose one side piece (12) a pin (18) or the like is mounted, which is displaceable perpendicular to the slider and is displaced by a spindle into its end positions according to Figure 4, the pin (18) extending into the slide fastener teeth in the one end position and releasing the teeth in the other end position. <IMAGE>
