Abstract (en)

The transporting device, particularly for pedestrians, goods or the like is characterised in that the zone (11) through which the said accelerator (9) loads the main transporter (1) and the zone (12) through which the said transporter (1) is unloaded onto the said decelerator element (10), are slightly raised with respect to, respectively, the loading zone of the main transporter unit (1) or the zone of the decelerator element (10) onto which the main transporter (1) is unloaded. <IMAGE>
