Abstract (en)

The invention relates to equipment for the transporting, the mixing with water and the distribution of powdery and/or aggregate materials to be used as mortar, plaster or the like having a final mixer-distributor (14) to which dry material feeding canalizations and a nozzle (20) for the supplying of water are fitted. The mixer incorporates means for mixing the initial materials with water and for spray distributing it or depositing the resulting mixture through a flexible tube (14a) in which there is a rotating helical conveyor (30). <IMAGE>
