Abstract (en)

A piece herein referred to as the left-hand piece (1) is intended to be secured to the left-hand wing (100) and a piece herein referred to as the right-hand piece (2) to the right-hand wing (200) of the door, each of these pieces comprising a flat metal member (1', 2') placed vertically on edge, to which is perpendicularly welded a lateral flat metal member (12, 27) in which is at least one drilling (13, 14, 28, 29), the two flat metal members (12, 27) being approximately of the same length and the drilling (13, 14) of the flat metal member (12) of the piece (1) being intended to come opposite the drilling (28, 29) of the flat metal member (27) of the piece (2). Each flat metal member (12, 27) may comprise two drillings, one of which is circular and the other oblong, each circular drilling (14, 28) in the flat metal member (12, 27) of one piece (1, 2) being intended to come opposite the oblong drilling (13, 29) in the flat metal member (12, 27) of the other piece (1, 2). <IMAGE>
