Abstract (en)
[origin: EP0510522A2] The invention describes a device (1) for transporting shopping items, luggage and the like in self-service stores, at railway stations or airports, the device (1) having at least one moving pavement (2) for the conveyance of passengers, and a number of transport trolleys suitable (23) for the moving pavement and a number of transport trolleys unsuitable (24) for the moving pavement being provided which are placed at the disposal of the customers or passengers for transporting the shopping items or the luggage, and the transport trolleys (23) suitable for the moving pavement being able to travel on the at least one moving pavement (2). In order to prevent transport trolleys (24) unsuitable for the moving pavement (2) from travelling on the same, a narrow point (7, 7') is provided at the access (6) to the moving pavement (2), which narrow point (7, 7') can be passed only by persons and transport trolleys (23) suitable for the moving pavement.
