Abstract (en)
[origin: EP0511043A1] Electromechanical switchgear, in particular for motor circuit breaker, comprising a main apparatus to which is adjoined an additive block of auxiliary contacts. The casing (40) of the additive block is reversible so as to be adjoined to the main casing, without modification, in a first position in which certain auxiliary contacts are open, and in a second position in which the same contacts are closed. <IMAGE>
