Abstract (en)

This frame consists of a C-shaped profile "2" made from metal or synthetic material, assembled by means of a slot, and obtained by extrusion or by folding. This frame is fixed to the wall "3" by the screws "4", or else braced onto posts. It allows installation or removal of the panels without any dismantling or with rapid dismantling of a vertical side of the frame. A snap ring "17", placed on the frame, makes it possible to use panels of varying thickness. Blocks "14", made of wood, metal or synthetic material, preferably of cylindrical form, placed in the profile forming the lower part of the frame, allow the lateral displacements of the panel necessary for installing it, and hold the latter in the frame. <IMAGE>
