Abstract (en)
Packaging of products in load form. The complete load is made up of a pallet (2), a load of products (6) built up in superimposed beds (10) and carried by the pallet, and a heat-shrunk plastic wrapping around the load and the pallet, the complete load being characterised in that the base (15) of the skirt (14) of the wrapping is connected to a belt (20, 21) surrounding the pallet. Application to the preparation of depalletised loads by means of automatic installation. <IMAGE>
