Abstract (en)

[origin: WO9208709A1] D, L-, L- and D-phenyl alanine derivatives of formula (I) defined in claim 1 in which R1 is an amidino-, guanidino-, oxamidino-, aminomethyl- or amino group have been discovered which effectively prevent blood coagulation or thrombosis. The antithrombotically active compounds have low toxicity and may be administered by mouth, subcutaneously or intravenously.

Abstract (fr)

On a découvert des dérivés de la D, L-, L- et D-phénylalanine de formule (I), définie dans la revendication 1, où R1 désigne un groupe amidine, guanidine, oxamidine, aminoéthyle ou amine, qui ont une action anticoagulante ou antithrombotique. Les composés à action antithrombotique présentent une faible toxicité et peuvent être administrés par les voies orale, sous-cutanée ou intraveineuse.
