Abstract (en)

[origin: JPH05154998A] PURPOSE: To obtain a rotary pressing machine and a workshop trolley facilitating work of replacement for repair and servicing of a certain cylinder, e.g. an anilox cylinder, in a rotary printing machine. CONSTITUTION: In a rotary printing machine, a horizontal exchangeable cylinder 15 is held between two sidewalls of a machine frame 10 and held by driving means 40, 41. A movable table 30 is arranged between the sidewalls of the frame 10 so that the cylinder 15 may be moved vertically. The cylinder 15 is moved on a carriage 20 arranged at a height which enables removal of the cylinder from the machine by sliding it on a horizontal plane.

Abstract (fr)

La machine d'impression rotative comprend un cylindre horizontal (15) amovible tenu entre deux parois latérales du bâti (10) de la machine par des moyens de maintien et d'entraînement (40, 41) dégageables à volonté. Une table mobile (30) est disposée entre les parois latérales du bâti (10) pour permettre de déplacer verticalement le cylindre horizontal (15) pour l'amener ensuite sur un transporteur (20) placé à une hauteur autorisant son extraction hors de la machine par un déplacement dans un plan horizontal.
