Abstract (en)
[origin: EP0511517A1] The invention relates to a guiding device of split construction for turbomachines. Flow-controlling blades located inside the guiding device are each formed in two parts. One part of the guiding device has a group of blade parts (8) and the other part of the guiding device is provided with the remaining blade parts (11). The blade parts are spliced together to form a uniform whole. <IMAGE>
