Abstract (en)  
[origin: EP0511551A1] The production of ring-core coins and medals presupposes a multistage process and corresponding apparatuses, first the ring round (3) punched or shaped in the outer die (4, 7) being fed, before the piercing of the core hole (10), by means of a first feed/separating apparatus (26) to the dial plate (20) and by means of the dial plate to the punching press (8) having the tool (9) for piercing the core hole, the core round (13) preformed in the outer die (14, 17) being fed, after the piercing of the ring round, to the dial plate by means of a second feed/separating apparatus (27) and inserted into the ring round moved together with the dial plate, and at the same time being fed together with said ring round, in the dial plate, to the punching press (18) having the tool (19), for the purpose of joining together. <IMAGE>
