Abstract (en)

A fuse setting tool comprises a manually grippable body (5, 6), and an aperture (7) in the body is adapted to cooperate around a rotatable portion of the fuse. Detent means (8) are provided within the aperture which cooperate drivingly with detent means (4) of the fuse. A light source means (9) is disposed on the body to illuminate at least a portion of the fuse, and means are provided to power the light source means. <IMAGE>
