Abstract (en)  
[origin: DE4001785A1] The display unit disclosed, which is particularly suitable for displaying song titles in a juke box, has, located in a housing (1), two adjacent stacks (3) of data supports (2) disposed vertically behind each other, the front of each data support being designed as a display surface. The two stacks (3) can be driven to move in steps, synchronized with other, staggered by the thickness of a data carrier (2). In the staggered arrangement of the stacks, the front data carrier (2) of one stack (3) and the back data carrier (2) of the other stack (3) can each be moved simultaneously over to the other stack (3). In addition, the direction in which the data carriers are moved can be reversed.
