Abstract (en)
[origin: EP0512185A1] A lifting device (4) for alternatively lifting and lowering a pendant switch (5) is provided on a crane (1). The pendant switch (5) serves to control the crane (1) and/or lifting gear (3). A control line (7) is provided between the pendant switch (5) and the crane (1). The lifting device (4) contains a receiver (9). The lifting device (4) can be controlled via the receiver (9). The receiver (9) can in turn be radio-controlled via at least one portable transmitter (10). <IMAGE>
