Abstract (en)
[origin: EP0512330A1] The drill bit according to the invention contains a body (1) to which rock-destroying members - rollers (2) - are fastened. A unit for generating hydrodynamic waves is arranged in the body (1). The unit is designed in the form of a swirl chamber (3) with tangentially arranged inlet passages (4) and with a conically tapering outlet passage (5), the end face of which is rounded off radially. <IMAGE>
