Abstract (en)

[origin: EP0512354A2] An ornament (1) which can be worn visibly at the ear (2) contains a hearing aid attached in a hidden manner. For this purpose, an assembly plate (6) which carries components (7 to 9) of the hearing aid can be inserted into a recess (5) of the rear wall (4) of the ornament facing the ear. On a bow (19), the ornament forming the housing of the hearing aid exhibits a clip (21) which engages behind the earlobe (3) and forms the holding element. <IMAGE>
