Abstract (en)

[origin: EP0512406A1] The invention relates to a small container (10) having a closure lid (28). In order to ensure that the closure lid (28) can be closed without damaging container seals (36) or cannot strike, for example, against a standing surface during opening, it is proposed that a hinge pin (38) of the closure lid (28) engages in a connecting link slot (40) which has spaced-apart portions for fixing the hinge pin (38). <IMAGE>
