Abstract (en)

[origin: EP0512809A1] A carton of the type wherein a pair of base panels (12,28) are interlocked by means of punch type locking elements (46, 48: t1, t2) and wherein the carton includes base panel openings (D1, D2) to allow the carton to be impalled upon article separator posts in a bottle crate. A locking tab (46,48) of the locking elements is adapted to engage in one of the base panel openings such that locking is enhanced when the carton is impalled upon a separator post entering that opening. <IMAGE>
