Abstract (en)

[origin: EP0512970A1] Apparatus for manufacturing or assembling load pallets constructed of wood from pre-sawed blanks/pieces, said apparatus comprising a first assembly line (I) for assembling the runners (5) of the load pallet of foot boards (1) and intermediate props (2), and a second assembly line (II) for assembling the load pallet of runners (5), intermediate boards (3) and deck boards (4), and each line (I and II) comprising nailing means (6<1>,6<2>). The first assembly line (I) and the second assembly line (II) are disposed side by side so that the transporting direction of the second assembly line (II) is opposite relative to that of the first assembly line (I); that the apparatus comprises a transport means (7) disposed to transport the runners (5) assembled on the first assembly line (I) to the second assembly line (II); and that the nailing means (6<1>,6<2>) of the lines (I and II) are combined to constitute one single nailing means entity (6). <IMAGE>
