Abstract (en)

[origin: WO9111251A1] Process for the mechanical treatment of fluid to slightly viscous media, especially water, waste water and water-cement mixtures, in which, to accelerate and improve the dispersion of the individual components of the medium, the latter is taken from a reservoir to a spraying device, the medium sprayed therefrom is collected and taken back to the spraying device and sprayed as often as necessary until the desired result of processing is obtained.
